2008 Eastman Sewer Company

Please note the NHPUC approved a temporary rate increase on December 30, 2008, with the increase being applied to service rendered in October 2008. The approved temporary rate is \$261.68 per year, billed in four (4) quarterly installments. First quarter \$75.01, second quarter \$65.42, and 3rd and 4th to be determined (old rate was \$224 per year or \$56 per quarter). In addition, the retroactive portion of the rate increase is \$9.59 to be included as a one-time charge in the billing of the first installment.

The second step of the rate increase process is to establish a permanent rate which will provide for the Company's operating requirements and planned capital improvements scheduled for 2009 and the first part of 2010. This process is on going and is not expect to be completed until the middle of 2009 at the earliest. The Eastman Sewer Company has proposed capital projects totaling approximately

\$337,000 for 2009, to include significant upgrades to the headworks facility at the treatment plant and to the West Cove A pump station. A significant increase in the expected costs for the headworks project will impact the final permanent rates.

2008 Village District of Eastman 70 cents per hundred gallons up to 60,000 gallons, then 90 cents per hundred. Meter readings are done semi-annually in May and November. The water supply is a well field in the Springfield section of the community. The water company is owned and operated by the Eastman users and is regulated by the Public Utilities Commission.

Cable/Internet Service provided by Comcast, call 1-800-COMCAST. The Eastman Community Association has its own dedicated channel. DDS systems may be installed but require the approval of the ECA/ECC.
